

INFO-COMM n. 02/20 – 04/02/2020

We wish to inform that following supply issues, IAME will start providing the spark plug cap NGK, IAME part number: 10543 (shown in picture) as an alternative to the current PVL, IAME part number: 10544.

P.N.: 10543

Since some years now, we have started indicating the PVL spark plug cap (p.n. 10544) in the IAME International Final technical regulations of the engines provided with such component, as the only one allowed. Should you have conformed the regulations of your national series to such regulations, with the same prescription, kindly amend them by adding the NGK, IAME p.n. 10544, option as well.

Kindly inform the concerned Race Promoters and/or your national Federation, should the regulations be in charge of either one or the other, depending on each specific case.

We thank you for your attention and we send our best regards.

IAME S.p.A.S.U.
